

Alper KAYALI

PERSONAL INFO

Date of Birth : 30.08.1995

Birth Place: İZMİR

Military Service: Done (June–December 2020)

COMMUNICATION INFO

E-Mail: alperkayali@outlook.com

Mobile: +90 533 0559623

Address : Akıncılar Nbh./Şirinyer/Buca/İZMİR

ABOUT ME

I have had a high interest in computer science from the moment I sat in front of the first computer that was bought for me in my childhood. As a person who should have started his working life as early as 16 years old, I had to postpone the opportunity to turn this interest into a professional career. However, I am trying to make up for the time in between with a very strict 300 hour .Net training course and personal efforts under the guidance and experience of Software Engineer Sedat Tefçi.

After talking about the universal features of programming languages in this course, I created Console Applications with C# and then Windows Forms applications with .NET. I continued with MSSQL lessons for 60 hours and then rearranged .NET and Windows Forms applications to be CORE applications. I have performed CRUD operations on the local database within the scope of applications and I did not hesitate to use all the flexibility and advantages MSSQL offers for the necessary optimizations.

I reinforced what I learned during this whole process by creating a sample website in the field of E-Commerce with .NET Core MVC as my course completion project. I hosted dynamic codes within the scope of the whole project. I tried to write as clean code as I could for readability, transferability and testability.

Continuing the user experience using JavaScript and Bootstrap in my project. I wanted to make. For now, I made my project a little more comprehensive with four WebAPI integrations (exchange rate, weather, events in Izmir and pharmacies on duty).

I also have an infancy project for musiccollective.com on publishing interactive articles about music and artists.

It is the most beneficial and beneficial way of working in harmony with the sharer and the team. I believe it is an educational way of working. I have developed the dedication and determination required for this in my own working life for years, and now I want to put this into practice in the software industry.

In this context, from the beginning of the 2023-2024 academic year, I will enroll in a university education program as a Computer Programming student.

You can view my completed and under development projects on alperkayali.com, you can review the source codes from the github.com link I specified.

EDUCATION

İzmir Katip Çelebi University

İİBF / İktisat

2014 – 2017 (Drop out)

Bornova Hatice Güzelcan Anatolian

High School

September-2009 / June-2013

FOREIGN LANGUAGE

- English: Reading, Writing, Listening (C1 Level)

COURSES

- İ-Akademi .NET ASP Core (300 Saat)
- C#
- MSSQL
- .Net & .NET Core MVC with N-tier Design
- Windows Forms
- Windows Console Applications
- HTML
- CSS
- JavaScript
- Bootstrap.

SKILLS

- MS Word (4/5)
- MS Excel (4/5)
- MS PowerPoint (4/5)
- Adobe Lightroom (Orta Seviye)

HOBBIES AND INTERESTS

- Basketball
- Photography
- Road Cycling
